selfglow SECOND

Let us present the

selfglow

line

HIGHLIGHTER
AND BRONZER

With this duo, not only your
skin but also your inner
radiance will shine.

selfglow

HIGHLIGHTER
AND BRONZER

With the **back injection** method, we have created two products of two shades. Due to the innovative formula, they are both very easy to use. With our bronzer and highlighter, you can shape and emphasize the facial features with a natural effect.

The **back injection** method is an innovative technological process of making pressed products. First, a liquid formula with all the pearls in it is prepared. Then, the product is injected into a plastic bowl and evaporated so that even the smallest and volatile pearls remain in it. With this process, we can prepare very fine formulas that get applied easier, last longer, and are more luminous.

selfglow

BRONZER

Two color versions: **light** for light skin tones and medium for **tanned** and swarthy skin complexion.

- Two bronzer shades enable a gradual effect. You can subtly shape your face or give it a golden beach tan.
- The combination of gold and pink pigments creates an exceptionally natural effect, emphasizing the natural skin tone.
- The innovative light formula blends easily providing an effect of smooth skin.
- Active ingredients - coconut oil and blackcurrant seed oil nourish and moisturize the skin.

selfglow

HIGHLIGHTER

- The combination of two champagne shades closed in one makes the product very versatile. You can match them depending on your complexion type.
- Applying them separately or mixing both colors gives countless effects.
- The dry application provides a natural, silky glow, and the wet application makes it possible to achieve an impressive taffeta effect.

SUPERPOWERS

selfglow BRONZER

Coconut and black currant seed oil -
nourish the skin and make the application of the
creamy product very easy

selfglow HIGHLIGHTER

Blackcurrant seed oil -
nourishes and moisturizes the skin giving it a healthy glow
