PRESENTS

we have a patent
for moisturized
and healthy skin!

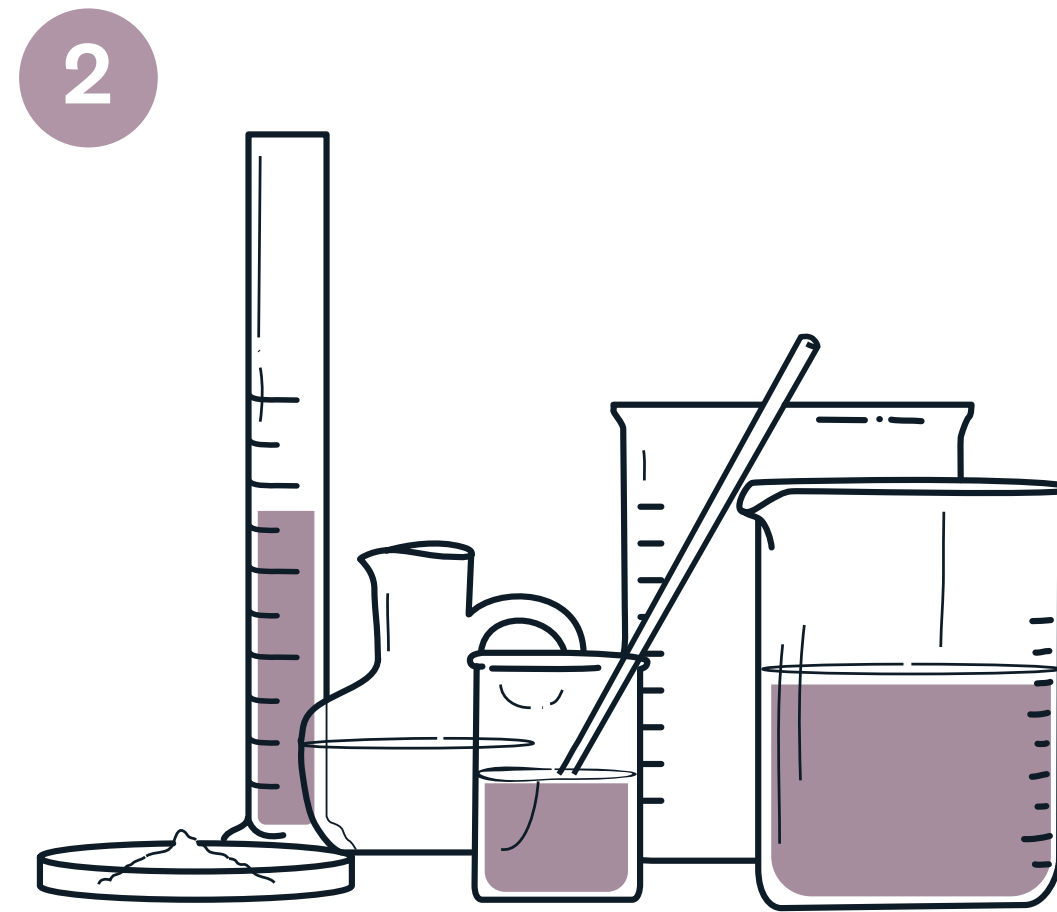

PATENTED TECHNOLOGY

beautiful skin is well-cared skin

With a strong passion for both technology and nature, we have encapsulated **blackcurrant seed oil** in nanoparticle in our laboratory near Krakow. This makes it possible for the skin to benefit more from its nutrients.

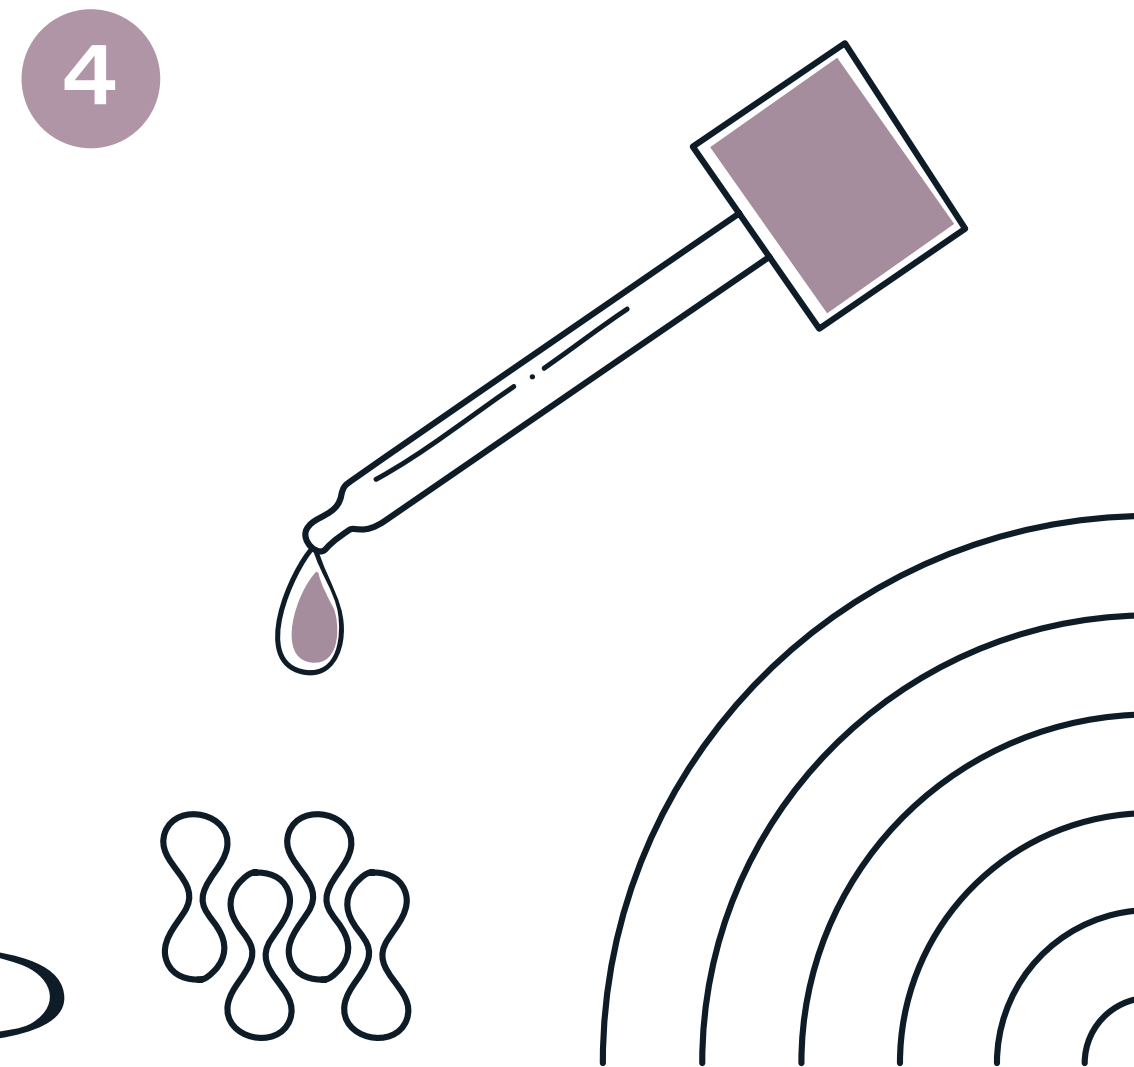

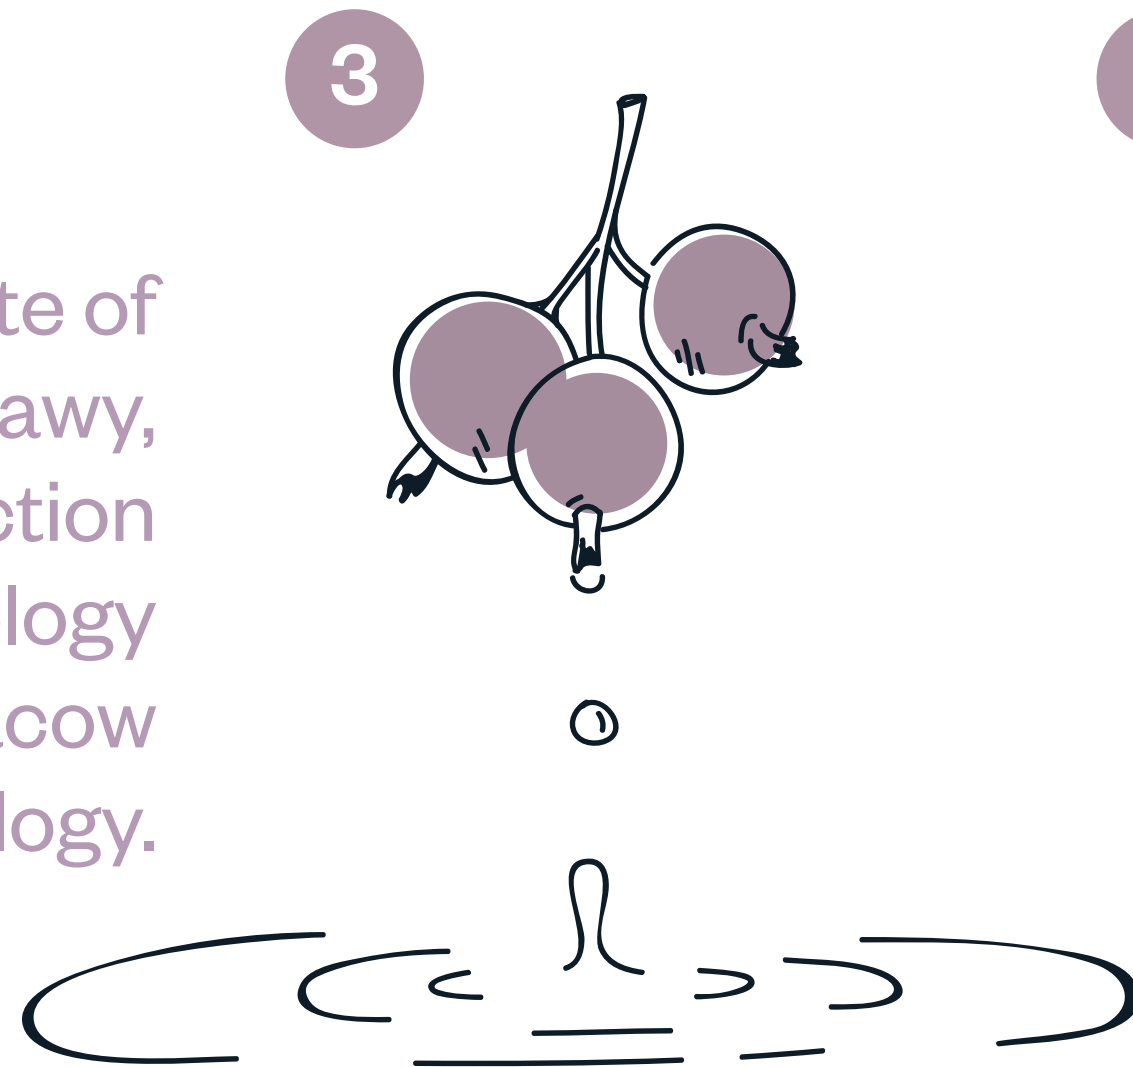

how did we do it?

We used blackcurrant pomace from juice production.

This innovative method of extraction protects the oil from the negative effects of oxidation. Thanks to this, we receive the oil in its purest form, preserving all its natural properties.

Dried seeds went to the Institute of New Chemical Syntheses in Puławy, where they underwent the extraction process, which uses a technology created together with the Cracow University of Technology.

The oil obtained in this way is subjected to ultrasound, which disrupts it into nanoparticles. We then put them in our products so that your skin can enjoy them every day.

why have we chosen blackcurrant seed oil?

Because it contains an unparalleled combination of five EFAs (essential fatty acids)

- **linoleic acid (LA)** – synthesizes the other acids of the Omega-6 family responsible for maintaining balanced skin hydration
- **linolenic acid (GLA)** – its deficiency causes loss of skin elasticity, which significantly accelerates the formation of wrinkles
- **linolenic acid (ALA)** – strengthens epidermal cells and the skin's protective barrier
- **oleic acid** – promotes skin regeneration and the formation of new cells
- **stearic acid** – rebuilds the skin's lipid coat

PATENTED TECHNOLOGY

With our patented and innovative technology, we have prepared two extraordinary products for all skin types!

LET US INTRODUCE

PATENTED TECHNOLOGY

hydrating
& anti-aging
SERUM

hydrating
& calming
ESSENCE MIST

hydrating & calming

ESSENCE MIST

This is extraordinary and rich in active ingredients beauty product, which will make your complexion **soothed and hydrated**. The mist tones the skin and prepares it for the next stage of skincare – the application of a serum. It will successfully replace tonic, hydrolat, and thermal water. It is an excellent product for makeup refreshment during the day. It is irreplaceable when it comes to refreshing the face during hot days.

what will you benefit from using the mist essence?

After 4 weeks of use, there will be an over **43%*** increase in the epidermis hydration and a **19%*** reduction in skin redness. In addition, regular use of the essence results in a reduction in **skin discoloration.**

what will you find inside?

PATENTED TECHNOLOGY

Blackcurrant seed oil encapsulated in a nanoparticle – activates the renewal process of the epidermis. It deeply nourishes it and intensively hydrates it. It controls sebum secretion and reduces skin redness.

The seven plants extract – kiwi, papaya, raspberry, peach, apple, cucumber, and strawberry - is an active complex that effectively moisturizes the skin.

Aloe extract – has a toning, soothing and moisturizing effect on the epidermis.

Deep seawater from the French Atlantic coast with a high content of minerals such as magnesium, iron, and zinc.

Bergamot water – shows a relaxing and toning effect.

how to use our mist essence?

Apply to a cleansed face and décolleté. Use along with **hydrating & anti-ageing serum** to achieve the best results. Shake before use.

Who is it for?

For men and women of all skin types.

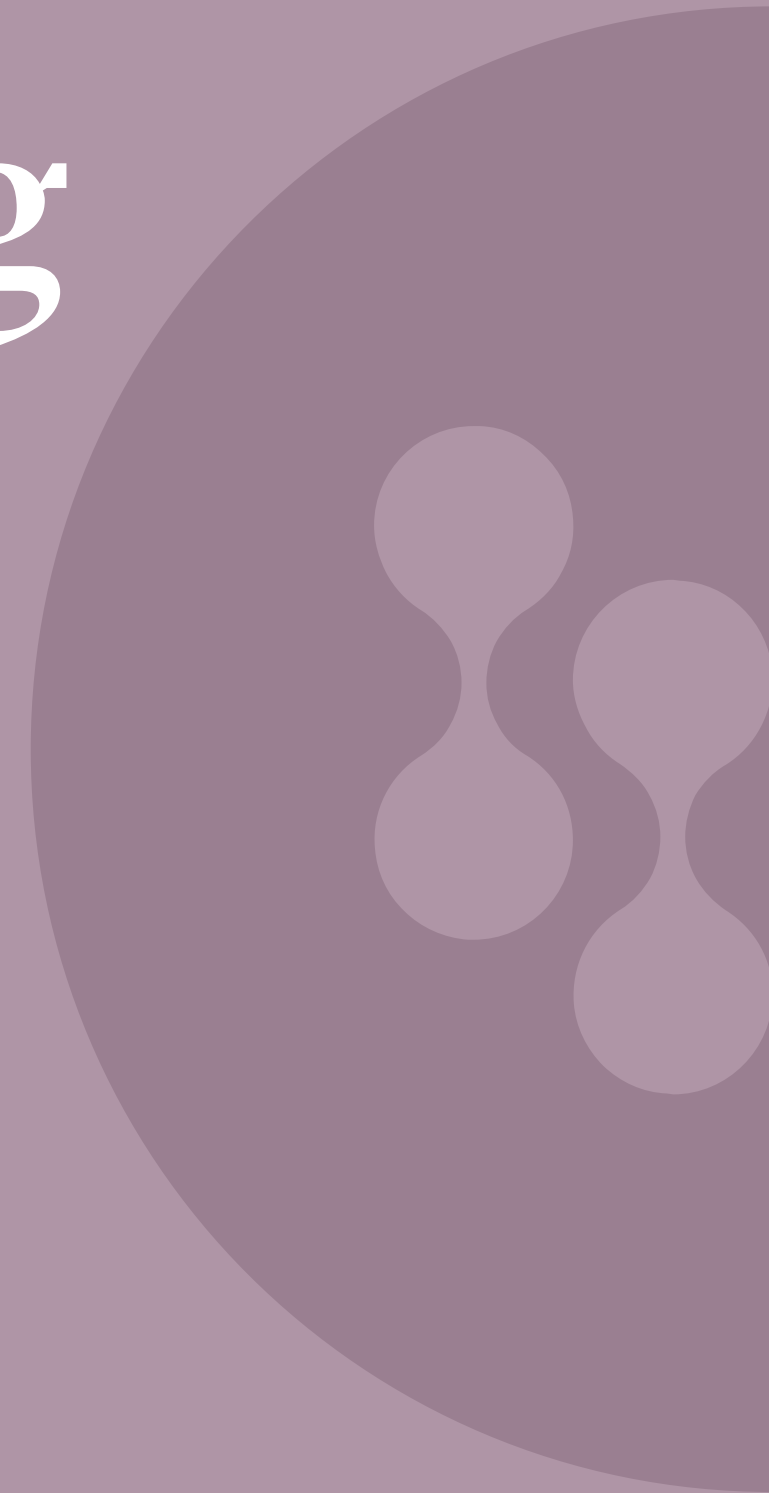

hydrating & anti-aging

SERUM

A rich in active ingredients serum that **moisturizes the skin** and **reduces fine lines**. It affects irritated skin **soothing** and calming it down like a **bandage**. Its lightweight formula is instantly absorbed into the skin, leaving no greasy film. Perfect under makeup.

what will you benefit from using the serum regularly for 1 month?

- more than **53%** increase in skin hydration
- deep fine lines reduction by up to **16%** and their length by **26%**
- reduced sebum production
- skin nourishment and increased elasticity

what will you find inside?

PATENTED TECHNOLOGY

Blackcurrant seed oil encapsulated in a nanoparticle – activates the renewal process of the epidermis. It deeply nourishes it and intensively moisturizes it. It regulates sebum secretion and reduces skin redness.

Deep seawater from the French Atlantic coast with a high content of minerals such as magnesium, iron, and zinc.

The seven plant extract (kiwi, papaya, raspberry, peach, apple, cucumber, and strawberry) – ensures proper skin hydration.

Prickly pear and rosehip oil – provide the anti-aging and firming effect.

Shikonin Asian root extract – soothes the complexion and makes the serum pink.

how to use the serum?

Once you have applied the **hydrating & calming essence mist**, apply a few drops of the serum and spread evenly over the entire face, neck, and décolleté.

did you know?

All skin types **need hydration.**

Skin moisturizing is the basis of daily skincare. A well-moisturized skin is smooth, healthy-looking, and ages much more slowly.

take the water challenge

#nanorevitchallenge

Every day for 1 month:

- apply the essence and serum from the Nanorevit line in the **morning and evening**
- **drink** a minimum of 2 liters of water per day

Enjoy healthy and hydrated skin!

Our **serum and essence mist duo** is a **must-have** for the holiday skincare routine.

They are the **perfect after-sun products.**

They will **soothe the skin, deeply moisturize and calm it.**
